

1. Fill in the gaps with a word from each hexagon. All the words are no longer than 6 letters and they can read in a clockwise or anti-clockwise fashion starting at any point in the hexagon.

2. Once you have found the 50 words, use the rest of the letters and write a word A to I across the rows. The letters for each word are in the right order. Read the text again and decide which box each word belongs to.

3. Listen and check your answers!

A 10x5 grid of 50 hexagons, each containing a number and a 6-letter word. The words are arranged in a honeycomb pattern. To the left of the grid are labels A through I with arrows pointing to the rows.
